ASH
BLACK OUT

Product description

Black out Ash is made from Ash from Burgundy Franche Comté. This finish is perfect for creating furniture or wall coverings for interiors. The burning and brushing process highlights the veining of this essence, which can take on different colors depending on the light.

Treatment

We treat our products with an ecological oil that fixes carbon on the surface. This protection preserves the appearance while remaining virtually invisible. This oil exists in colorless or black tinted version. It also protects against the dirt that raw carbon can cause.

Maintenance

This finish recommended for interiors does not require any special treatment. Cleaning with water and a soft cloth will be sufficient in case of dirt.
