OAK
BLACK OUT
END GRAIN

Product description

Black Out Oak is made from oak from Burgundy Franche Comté. Cut perpendicular to the fiber, end grain wood offers unrivaled design and longevity and solidity. The juxtaposition of the oak paving stones particularly highlights the veining. This finish is perfect for creating wall coverings, floors, or even table tops.

Size of sections on request.

Treatment

We treat our products with an ecological oil that fixes carbon on the surface. This protection preserves the appearance while remaining virtually invisible. This oil exists in colorless or black tinted version. It also protects against the dirt that raw carbon can cause.

Maintenance

This finish recommended for interiors does not require any special treatment. Cleaning with water and a soft cloth will be sufficient in case of dirt.
